

Aim:

Write a java program(s) that use collection framework classes.(HashTable class)

Source Code:

HashTableclass.java

```
import java.util.*;
import java.io.BufferedReader;
import java.io.InputStreamReader;
public class HashTableclass{
    public static void main(String [] args) throws Exception {
        BufferedReader br = new BufferedReader(new InputStreamReader(System.i
n));
        System.out.print("No.Of Mapping Elements in HashTable:");
        int hashTableSize = Integer.parseInt(br.readLine());
        Hashtable<Integer, String> hashTable = new Hashtable<>();
        for(int i=0;i<hashTableSize;++i){
            System.out.print("Rank:");
            int rankVal = Integer.parseInt(br.readLine());
            System.out.print("Name:");
            String nameVal = br.readLine();
            hashTable.put(rankVal, nameVal);}
        Enumeration keys = hashTable.keys();
        while(keys.hasMoreElements()) {
            int nextKey = (int)keys.nextElement();
            System.out.println("Rank : " + nextKey + "\t\t" + " Name : " + has
hTable.get(nextKey));}}}
```

Execution Results - All test cases have succeeded!

Test Case - 1	
User Output	
No.Of Mapping Elements in HashTable: 3	
Rank: 4	
Name: Robert	
Rank: 5	
Name: John	
Rank: 6	
Name: Jennifer	
Rank : 6	Name : Jennifer
Rank : 5	Name : John
Rank : 4	Name : Robert

Test Case - 2	
User Output	
No.Of Mapping Elements in HashTable: 3	
Rank: 1	
Name: Jon	
Rank: 2	
Name: Robert	
Rank: 3	
Name: Jennifer	
Rank : 3	Name : Jennifer
Rank : 2	Name : Robert
Rank : 1	Name : Jon
