

Aim:

Write a program to demonstrate constructor class

Source Code:Student.java

```
class Student{
    int num;
    String name;
    //method to display the value of num and name
    void display(){
        System.out.println(num+" "+name);
    }
    public static void main(String args[]){
        //creating objects
        Student s1=new Student();
        Student s2=new Student();
        //displaying values of the object
        s1.display();
        s2.display();
    }
}
```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
0 null
0 null
