

**Aim:**

Write a java program to demonstrate operator precedence and associativity

**Source Code:**OperatorPrecedence.java

```
import java.util.Scanner;
class OperatorPrecedence{
    public static void main(String args[]) {
        int x,result;
        System.out.print("Enter a num: ");
        Scanner sc=new Scanner(System.in);
        x=sc.nextInt();
        result=x++ +x++*--x/x++ - --x+3>>1|2;
        System.out.println("The operation going is x++ + x++ * --x / x++ - --x +
3 >> 1 | 2");
        System.out.println("result = "+result);
    }
}
```

**Execution Results** - All test cases have succeeded!

Test Case - 1
User Output
Enter a num: 4
The operation going is x++ + x++ * --x / x++ - --x + 3 >> 1   2
result = 3

Test Case - 2
User Output
Enter a num: -3
The operation going is x++ + x++ * --x / x++ - --x + 3 >> 1   2
result = 2
